CHAPTER 8:
USING ENDNOTE WHILE WRITING A PAPER IN MICROSOFT WORD

Continue with this part of the tour if you use Microsoft Word 2007, or 2010.
EndNote’s Cite While You Write feature inserts EndNote commands into an EndNote tab in Word 2007 and 2010 to give you direct access to your references while writing in Microsoft Word. The Cite While You Write commands enable EndNote to do bibliographic formatting to the document that is currently open in Word.

This chapter covers the following topics.
• Inserting EndNote References
• Selecting a bibliographic style
• Editing a citation

Inserting EndNote References
Open a new document in Microsoft Word

We are going to start entering some text and citations for this tour. This example assumes that your output style is set for Annotated. If not, we will show you how to select an output style in Selecting a Bibliographic Style.

1. Enter the following text as though you were writing a paper.

   Bats

   Bats are mammals of the order Chiroptera from the Greek “hand” and “wing” whose forelimbs form webbed wings, making them the only mammals naturally capable of true and sustained flight.

   Place your cursor at the end of the sentence. That is where you will insert a citation.

2. From the EndNote X7 tab, click the Insert Citation icon.

3. The Find & Insert My References dialog box appears. Type the author name “Avila” in the text box, and then click Find.

   EndNote lists the matching references. The full name Avila-Flores appears in the dialog.

4. Click the Down Arrow on the Insert button to display a menu.
Select the Insert option.

EndNote inserts a citation and Instant Formatting formats the citation in the currently selected style and adds it to a formatted bibliography at the end of the paper.

EndNote automatically creates a link from the citation to the bibliography. If you have multiple bibliographies (for example, one at the end of each chapter and one at the end of the document), you can link in-text citations to the reference list at the end of each section and/or chapter. See Selecting a Bibliographic Style for information on how to turn this feature on and off.

5. Add more text to the paper:

Bats represent about 20% of all classified mammal species worldwide with about 1,240 bat species divided into two suborders.

Place your cursor at the end of the sentence. That is where you will insert another citation.

6. From the EndNote X7 tab, click the Insert Citation icon.

7. Type the date “2008” into the text box, and then click Find. EndNote searches all fields and lists the matching references.

8. Highlight the reference by the author Holland.
9. Click the Down Arrow on the Insert button to display a menu. Select the Insert option.

Your document text should look similar to this example.

**Bats**

Bats are mammals of the order Chiroptera from the Greek “hand” and “wing” whose forelimbs form webbed wings, making them the only mammals naturally capable of true and sustained flight. Bats do not flap their entire forelimbs, as birds do, but instead flap their spread-out digits, which are very long and covered with a thin membrane or patagium. (Avila-Flores and Medellin 2004) Bats represent about 20% of all classified mammal species worldwide with about 1,240 bat species divided into two suborders. (Holland, Kirschvink et al. 2008)

**Note:** You can also insert citations in footnotes. First, use the appropriate Word command to create the footnote. Then, insert the EndNote citation in the footnote. Word controls the placement and numbering of the footnote and EndNote formats the citation based on the current style.

---

**Selecting a Bibliographic Style**

Format your citations and bibliography as many times as you like, changing the output style and various other layout settings each time.

1. From the EndNote X7 tab, in the Bibliography group, click the bottom corner arrow to display a Configure Bibliography dialog.

Select a bibliographic style.

![Configure Bibliography](image)

Styles contain instructions for how EndNote will format citations and the bibliography. Some styles sequentially number citations, and then insert a numbered reference list at the end of the paper. Other styles insert Author-Date citations.

As you can see, there are other formatting options available here. You can make changes that override the settings in the current output style.

2. The Annotated style should appear in the “With output style” field. If not, click the Browse button next to the field, and select the Annotated style.
3. Click the Underline linked in-text citations check box so that our citations within a document are visible as hyperlinks with underlining and blue text.

4. Click OK to leave the Configure Bibliography dialog.

EndNote automatically updates the existing citations and regenerates the bibliography in the Annotated style.

Your document text should look similar to this example.

**Bats**

Bats are mammals of the order Chiroptera from the Greek “hand” and “wing” whose forelimbs form webbed wings, making them the only mammals naturally capable of true and sustained flight. Bats do not flap their entire forelimbs, as birds do, but instead flap their spread-out digits, which are very long and covered with a thin membrane or patagium. (Avila-Flores and Medellin 2004) Bats represent about 20% of all classified mammal species worldwide with about 1,240 bat species divided into two suborders. (Holland, Kirschvink et al. 2008)

**Note:** In the future, if you need to make changes to the paper such as adding or deleting citations or text, just do the necessary updates in your paper. If you want to change the output style or bibliography layout settings, select the Configure Bibliography command again. *EndNote* will reformat the in-text citations and generate a new bibliography based on your changes.

---

**Editing a Citation**

If you directly edit a citation or the bibliography, the changes will be lost when you select the Configure Bibliography option again because *EndNote* reformats according to the rules of the selected output style. To make and retain changes to all citations and/or the bibliography, modify the output style. However, if you want to make a change to an individual citation, select the Edit & Manage Citation(s) option.

For some bibliographic styles, the majority of references are cited in an “Author, Date” format; but if the author’s name is mentioned within the paragraph text, the style dictates that the name not be repeated in the citation.

1. Click anywhere on the Avila-Flores citation.

2. From the *EndNote* X7 tab, click Edit & Manage Citation(s).

3. Select the Edit Citation tab.

4. From the Formatting menu, select the Exclude Year option.

5. Leave the Prefix, Suffix, and Pages fields blank.

6. Click OK to update the citations in your paper.
7. Click anywhere on the Holland citation within Word.
8. From the Formatting menu, select the Exclude Year option.
9. Click OK to update the citations in your paper.

Your document text should look similar to this example. Note that the date is gone from the Avila-Flores citation.

**Bats**

Bats are mammals of the order Chiroptera from the Greek “hand” and “wing” whose forelimbs form webbed wings, making them the only mammals naturally capable of true and sustained flight. Bats do not flap their entire forelimbs, as birds do, but instead flap their spread-out digits, which are very long and covered with a thin membrane or patagium. (Avila-Flores and Medellin) Bats represent about 20% of all classified mammal species worldwide with about 1,240 bat species divided into two suborders. (Holland, Kirschvink et al.)

As you are working, remember to save your document. You can continue adding text and bibliographic citations to your paper and EndNote will continue adding to the list of references.
